

MILLS ðFSMö

For medium and fine grinding of abrasive materials

Main materials covered:

alumina
Bauxite
Fireclay
feldspars
magnesite
Olivine
Limestone
Glass

Fields of application:

Mining industry
Ceramic
Chemistry
refractory

ADJUSTMENTS GRANULOMETRY

Mill FSM can be equipped with static or dynamic classifier, with pneumatic feeding. It can work in the grinding closed circuit with recycling of the "oversize" material. To obtain some products (0.1-0.4mm) it's provided the use of vibrating screens inside in the grinding circuit.

MODELS

FSM	MODEL	CAPACITY Kg/h	POWER kW	CLASSIFIER Model W
1	550	100-1.000	15	8-10
2	1000	400-3.500	45	12-14
3	1300	800-7.000	75	16-18
4	1500	1.500-13000	110	18-20
5	2000	3.000-26.000	200	22-24
